Thought it might be just another Arkanoid clone and couldn't be more wrong. This game is amazingly entertaining. The game is really fun and addictive! Definitely a good buy if you like this sort of arcade game. Reminds me of resogun.. Great graphics, great intriguing story until the end, the game runs smoothly and interacting with objects is very easy. Length of this game i'd say is about 2 hours really stretching it out. I had a bug where if I tabbed out of the game and back in, I could no longer interact with objects and therefore had to restart leading to save issues as the game only saves during certain check points, which was annoying. The ending is absolute dog♥♥♥♥♥♥ Most people will see the end take shape about halfway or three quarters through exploring the home. The ending begins just as you might expect and you are absolutely FULL OF QUESTIONS!!!! The excitement and possibilities had my heart racing only for you to walk through one door and watch a cutscene on one of the walls of the next room play. This scene's narrative can be boiled down to "cuz ♥♥♥♥ you thats why" Then the credits roll. At no point do we see any real conclusion of the characters development nor we do we get any information on who the third party is calling us from within the home. I think I bought this for less than $10 IIRC, I'd say it's barely worth that. I cannot in good faith recommend this game unless you are just looking for a walking simulator to scratch the itch because you've played most of the good ones.. Fun runner game with easy achievements! Recommended. :D. It's a fun and fast game! Only downside is that if try to change controls my game crashes.. how do i hide this game, so people can stop judging me

On the Vive here.

- I found the controlls to be absolutely horrible.
- The scene was boring. (Kudos for the deer kill on impact tho)

- But!! It made me want to cover my head when crashing in a tree, and then made me fall over on the floor when crashing after a big jump, and THEN my boyfriend asked to try it, and he also fell on his butt on the floor a couple times. ^_^ That made it worth it.

Thnx. This was quite fun for the first several hours but quickly becomes repeated maps and starts to grind. I really liked the setting and the unique subject.. The premise of this game is great, but the execution is poor.

The feature that allows you to use music files on your computer is rendered completely ineffective by the game's inability to interpret beats for purposes of the main game mechanic of timing combos.

In fact, Turba doesn't even interpret its own beats reliably. Combined with complications introduced by exploding bomb tiles that render the playing field of the game more difficult and the unpredictable placement of tiles, this game goes beyond impressing a sense of difficulty and instead presents itself as broken and untested.

In summary, the visual aesthetics and concept are stellar, but this game is not in a state where it is fun to play.. Ever since playing revenge of the mutant camels on C64 I love the frantic colorful worlds that Jeff Minter creates, and this one takes it to a new level with VR. Moolicious!!. Game was done in less than an hour. Gameplay felt clunky and the challenge simply wasnt there. I expect more when I pay $5 for a game. Got a glitch where I could see one of the dream triggers before I walked into it. I get it, you guys are probably new to the game scene and you've got to build up your textures but this is not the way to make a splash in the world. Shame on you.. https:\/\/youtu.be\/TV6USM_A61Y

It's pretty fair to describe stalker as a diamond in the rough. There is a lot of diamond here but you also have to dig through a lot of rough to get to it.

Gameplay wise this is a decent FPS. The zone feels brutal and melancholy. The visuals still look pretty good and the action can be quite brutal. With some great enemy types as well as environmental dangers the world really does feel desolate.

By far the biggest problem is the bugs and glitches that litter the game. There are a lot of technical issues from frame hitching, to random crashes, to corrupting saves amongst the problems. Save often, and back the saves up - this will save a lot of frustrations.

Of course the other option is to grab one of the many free mods available that patch a lot of the bugs as well as add some extra polish to an already great classic. And as an added bonus there is still even people playing MP!

So for the money SHOC still provides a massive amount of game and replayability, just be prepared to take the rough with the smooth.

. this game is perfect, an update probably wouldn't help
